Performance characteristics vary with applications. To optimize nominal specifications, loads must be evenly distributed to reach capacity. Load construction, support conditions, transportation, load retention, user facility and temperature are factors that affect pallet capacity.

About Greystone

Greystone Logistics manufactures plastic pallets made from recycled plastic, sells processed recycled plastic and rents and leases plastic pallets. The Company is focused on capturing market share in an organically growing market being driven by environmental concerns. Our success and growth has been based on a unique proprietary process for the manufacture of pallets from recycled plastic for delivery to the beverage, manufacturing, pharmaceutical and other industries. In addition to the production of plastic pallets, Greystone is also a leading North American supplier of recycled processed resin and pallet lease pool programs. For more information contact:
